ABSTRACT

The 121 items in this bibliography include measures or questionnaires that require respondents to give information about their background, work history, or educational history. Populations assessed are: students, teachers, alcoholics, patients, and potential employees. Although all ages are represented, the majority of tests target adults. This document is one in a series of topical bibliographies from the Test Collection (TC) at Educational Testing Service (ETS) containing descriptions of more than 18,000 tests and other measurement devices prepared by commercial publishers, teachers, educational institutions, professional associations, departments of education, counselors, etc. Each description contains the following basic information: TC Accession Number (a six-digit identification number assigned by the Test Collection); the title of the instrument; personal or institutional author; year of publication or copyright; availability source; grade level for which test is suitable; age level for which test is suitable; and abstract. Other information, which is provided when known, includes subtests, number of test items, and time required to complete the test. Information on accessing the Test Collection via Internet concludes the document. (HAC)

AB ABSTRACT: This two-part resource instrument considers intercultural business and worker relationships between the manager or supervisor and worker. The respondent is presented, on Form A, with a short, realistic situation related to international commerce to which the individual is asked to respond using a common set of characteristics. These include: verbal and nonverbal communication, diet, clothing, business values and ethics, and work habits and practices. Also included are: work and family customs, beliefs and traditions. Form A helps individuals to assess perceived cultural differences between the American culture and the culture of a foreign country of their choice. The second part, Form B, narrows the focus of the perceived cultural differences between an American manager or supervisor from

an ethnic minority or young worker under 21 years old. The manager or supervisor considers his/her own cultural background and that of the worker according to the same common set of characteristics used in Form A.

AB ABSTRACT: Non-technical questionnaire used to collect preliminary information on a multiply-handicapped child from the parents' perspective. Emphasizes current information on child's problems. Best used with children between 2 and 8 years old but can be used with younger or older children. Is not a diagnostic instrument, NQP provides review of child's status and can be used prior to direct client contact to identify problem areas needing investigation. Areas covered by questionnaire include identifying information, services provided to the child, parent concerns, health care history, motor skills, diet and eating habits, communication, social-emotional issues, play and leisure time, and family life. Questionnaire results may be used by individual professionals, interdisciplinary clinical teams, day care and preschool staff, and university clinical training programs.

AB ABSTRACT: Multiple-choice and completion-type items which can be computer administered and scored using the Psychometer microcomputer-based service. The instrument can be used to gather information about 10 aspects of a client's background and current life circumstances. Items are written at an eighth-grade reading level. Inventory will take between 30 and 120 minutes depending on areas chosen for exploration and extent of client's problem. May be used for comprehensive psychosocial history for general medical or psychiatric patients; evaluation of a job applicant's work history; a criminal offender's history of legal difficulties, or a training applicant's educational history. Psychometer is a computer-based interactive testing system which administers and scores tests and provides printed evaluations. AB ABSTRACT: There are two forms for this instrument; one is for the parents and the other for the child. This has been designed to be used as an interview and should never be used as a paper and pencil questionnaire. The instrument covers nine major areas: general information, perceptions of the current issues, information regarding previous and current court actions, marriage data, occupational information, education, relationship with the child, additional information, and general descriptions. All of the areas covered will assist in making the custody decision and none should be eliminated. This interview form was designed to be used in making custody evaluations. The author recommends that in order to make as much information available to the courts during a custody inquiry, that other specific psychological instruments be used in addition to this interview to uncover the most important information; the testing should be tailored for each custody matter. The areas which the child's interview covers are general information, current issue, school, friends and siblings, parents, current situation, step-parents, fantasy productions, and general descriptions.

ETS TEST COLLECTION VIA INTERNET

The ERIC Clearinghouse on Assessment and Evaluation has mounted on its gopher site a database to help locate tests. This database can be used by accessing the gopher at the address: GOPHER.CUA.EDU. The ERIC/ETS Test Collection is located under: Special Resources/ ERIC Clearinghouse on Assessment and Evaluation/ Test Locator/.

To search the database, enter keywords from the title or descriptors. For example, if you would like to search for tests on oral language proficiency, you could type in all three words, or oral and proficiency. You may get slightly different results, but you will have information on a lot of tests to look at. If you know the title of the test, the best way to search is to use the main words in the title, not necessarily all of the words in the title. If you are looking for the Wechsler Intelligence Scale for Children-Revised, the most efficient way to search is with the words Wechsler, intelligence, and children.

INTRODUCTION TO THE ETS TEST COLLECTION

The Educational Testing Service (ETS) Test Collection database contains records on over 9,500 tests and research instruments. These records describe the instruments and provide availability information. The Test Collection encompasses virtually all fields from vocational interest inventories for adults to instruments that measure shyness or predict recidivism in released criminal offenders, to assessment of managerial style, as well as education-related achievement and aptitude tests. The test descriptions are indexed with ERIC Thesaurus terms for subject accessibility.

This is a joint project of ETS and ERIC_AE. ETS Library and Reference Services Division prepares the descriptions. ERIC_AE maintains the database and hosts the Search System. ERIC_AE has also begun to put ETS prepared test descriptions into the ERIC *Resources in Education* database. About 15 descriptions are added each month.

You may download individual and small groups of test descriptions and you may point to this service from any Gopher Site.

WHAT KIND OF TEST ARE DESCRIBED?

The Test Collection database collects a variety of instruments: achievement tests, aptitude tests, personality measures, attitude measures, career/vocational interest measures, occupational tests such as nursing or sales skills inventories. Many research instruments are collected as well as tests from commercial publishers.

WHAT INFORMATION IS AVAILABLE ABOUT THE TESTS?

The title, author, publication date and source appear in the record. An abstract describing the instrument, intended population, and uses accompanies the record. Subject terms give the age and grade level information as well as ERIC Thesaurus terms that describe the test.

DOES THE TEST COLLECTION DATABASE REVIEW THE TESTS?

No, other reference guides such as Mental Measurements Yearbooks, Tests: A Comprehensive Reference for Assessments in Psychology, Education, and Business, and Test Critiques distributed by Pro-Ed fill that role. You can search the tables of contents for the MMY and Test Critiques through the ERIC_AE Gopher Site.

ARE ALL THE TESTS IN THE DATABASE CURRENTLY IN PRINT?

No, some of the items are out of print. We suggest contacting the publisher for permission to use out-of-print materials. Phone numbers can be located using another menu option on the ERIC_AE Gopher Site.

WHERE CAN I SEE THE ACTUAL TEST INSTRUMENTS?

Availability information is provided in the records. Many colleges and universities have test collections in their libraries. Talk to you local librarian for more information.

WHAT IS TESTS IN MICROFICHE?

Tests in Microfiche is a subcollection of unpublished research instruments that are available for purchase in microfiche from the ETS Test Collection. The collection includes instruments appropriate for diverse populations (infants, learning disabled, adults, etc.) Each set spans a wide range of topics such as job satisfaction and attitudes towards school. More than 800 tests are available.

DOES THE TEST COLLECTION PROVIDE REFERENCE SERVICES?

No, the descriptive information in the database should help answer most questions people may have. And the publisher of the particular test is the most competent source of information. You can, however, route general inquiries to ERIC_AE@CUA.EDU.
